

GENERAL CONTRACTOR CERTIFICATION AND QUESTIONNAIRE

All General Contractors that are involved with DSHA-financed projects and/or receiving Low Income Housing Tax Credits (LIHTC) must be approved by DSHA. In order to be approved by DSHA, a General Contractor must complete the DSHA Contractor's Certification and Questionnaire process, provide requested information on all the required attachments, and be approved by DSHA thirty (30) days prior to invitation to bid or DSHA's application deadline (whichever is earlier). General Contractors must submit all required information to DSHA for approval on an annual basis. After DSHA has approved the General Contractor, the firm will be placed on the LIHTC Approved General Contractor List.

NOTE: All members of the Development Team, including the General Contractor must comply with DSHA's Draw Requisition and Cost Certification Guide. The guide can be found at the following link: http://destatehousing.com/Developers/developermedia/cost_cert_guide.pdf

Bidding Protocol/Requirements

1. The Developer/Owner of the development may determine the General Contractor at application and shall disclose the General Contractor as part of the Development Team or the Developer/Owner may opt to competitively bid the work after application and award. Regardless, the contractor will be subject to the following requirements:
 - a. The General Contractor will agree to a maximum of 10% General Requirements of construction hard costs for new construction and rehabilitation projects, including all change orders.
 - b. The General Contractor will agree to a maximum of 7% Builders Overhead and Profit of construction hard costs for new construction and rehabilitation projects, including all change orders.
 - c. There will be no increase to the Overhead and Profit or General Requirements other than what is approved by change orders during the course of the project. There will be no change orders approved solely to increase Overhead and Profit or General Requirements. At project completion, the Overhead and Profit and General Requirements percentages may not exceed the percentages submitted at application or approved at construction closing (whichever is less), but may be less than the approved percentages.
 - d. DSHA shall review and approve plans and specifications for construction work prior to release for bidding.
 - e. If the Developer, Development Team, and/or Applicant have related party and/or Identity of Interest ("IOI") subcontractor firms, they may not bid on the construction work or perform work on the development unless such arrangement has been reviewed and approved by DSHA at their sole discretion. The General Contractor may be required to obtain three (3) competitive bids for the identity of interest work and cannot charge any more than the lowest bid.

- f. If the General Contractor directly employs a trade, the General Contractor may self-perform the work (i.e. if the General Contractor directly employs a licensed plumber, the GC may self-perform plumbing trades on the job). The General Contractor may also self-perform other non-licensed trade line items; however, the General Contractor may be required to obtain three (3) competitive bids in all cases and cannot charge any more than the lowest bid.
 - g. The General Contractor must provide fully executed subcontractor contracts/agreements for **all** subcontractors (including IOI subcontractors) before any work is commenced prior to any payments being made to the subcontractor.
 - h. The Developer/Owner may not pre-bid certain aspects of the work and require the General Contractor to use those subcontractors, unless reviewed and approved by DSHA at their sole discretion.
 2. If the General Contractor is not part of the Development team at application, they must be chosen through a competitive bid process after an award of credits or approval of DSHA financing, and the following additional conditions will apply:
 - a. Developer/Owners shall invite all firms on DSHA's LIHTC Approved General Contractor List to bid and obtain a minimum of three (3) bids from the approved list of General Contractors that will provide bid estimates for the proposed projects;
 - b. No additional bidder requirements may be added without written approval from DSHA, which may be withheld in their sole discretion (examples include, but are not limited to, additional payment and performance bond requirements, letter of credit for contractors, unrealistic timing demands, construction schedule, liquidated damage requirements, etc.). DSHA shall review and provide written approval of bid documents prior to release for bidding;
 - c. The bids shall be sent to the architect of record in a sealed envelope, clearly marked with the project name and date stamped. Faxed or e-mailed bids shall not be accepted. The bids shall be privately opened, tallied, and the results forwarded to DSHA and Developer.
 3. In the event a General Contractor is selected at application as part of the Development Team and the Owner/Developer wishes to replace the General Contractor after application, the new General Contractor must be selected through the competitive bid process as outlined above.

NOTE: For any funding sources that require bidding of the construction costs (i.e. USDA, HUD), the bidding requirements of those funding source will control.

The information attached is requested in connection with the projected financing of proposed Housing Developments/HOME or LIHTC applications which may or may not be constructed or rehabilitated with DSHA financial sources. DSHA is required to exercise due diligence in ascertaining the accuracy and completeness of information which is material in the underwriting of the proposed financing which includes certification of the General Contractor.

The information which is to be provided by you in this questionnaire is subject to the Freedom of Information Act, unless otherwise deemed proprietary. Accordingly, DSHA requests that the questions on the attached be answered accurately and completely and all required information is submitted so that DSHA can make an assessment for approved General Contractor certification. If any question is not applicable, please so state and, unless self-evident, explain why. If the answer to any question is in doubt, or if you have any questions as to what associates or affiliates are covered by this questionnaire, or whether any facts are “material”, please set forth the pertinent facts so that DSHA or our counsel may consult with you or your counsel as to appropriate disclosure, if any. Please note that the “principals” of your firm includes owners, directors and senior officers.

After DSHA has approved the General Contractor certification, the General Contractor will be placed on a list of approved General Contractors. Developers will then choose between the two bidding options above for the General Contractor to arrive at construction costs for the development. DSHA must review/approve bid documents prior to release for bidding.

If a joint venture is proposed, an agreement must be submitted to DSHA, 45 days prior to invitation, outlining the current and long-term roles, terms, fees, and other conditions of the partners to the agreement. **Both parties must be on the LIHTC Approved General Contractor list.**

If General Contractor does not successfully complete warranty items from on-going or previous projects within 45 days of inspection, the General Contractor will be ineligible to bid on future projects until such corrective actions are completed. In addition, General Contractors are not eligible if they have failed to fulfill any obligations committed to in a previous application for LIHTC that has not been corrected to DSHA’s satisfaction.

General Contractor Qualifications will be established by DSHA’s determination of:

1. Acceptable financial capacity and credit score
2. Acceptable bonding and insurance capacity for the proposed development
3. Positive references
4. Satisfactory past performance history
5. Completed General Contractor questionnaire and attachments

DSHA has the right to determine acceptable General Contractor qualifications and capacity to complete a development successfully.
